

Schedule of electricity deemed contract charges for half-hourly, non-domestic customers

These charges have been set out by British Gas Trading Limited in relation to the British Gas deemed contract. All electricity supplied under the contract from 1st April 2024 will be charged in accordance with this schedule.

We may offer to enter into a formal contract with you instead of charging you based on our deemed rates. These charges are subject to change or withdrawal and can be changed with 30 days' written notice.

Your supply is also subject to terms and conditions. Unless we tell you otherwise, the charges in this schedule will apply to any customer supplied as a consequence of us receiving a direction from the Gas and Electricity Markets Authority (Ofgem) to act as the supplier of last resort.

Important information

The energy market is changing the what meters are charged. This means that costs will eventually be based on how much electricity these meters use every half hour. If your supply has recently been changed from non half-hourly to half-hourly, you'll continue to receive the non half-hourly prices unless we let you know otherwise.

Half-hourly rates

Half-hourly settled electricity sites will be charged as shown in the tables over (excluding whole current settled sites). The charges relate to each premises supplied under the scheme. All prices shown exclude VAT, CCL and other applicable indirect taxes, each of which will be charged at the prevailing rate applicable to your business. There may also be charges for excess reactive power and excess capacity. Details of formal contract terms and conditions are available from any of our offices or by visiting our website. The charges relate to each site supplied under the contract.

Targeted charging review

Standing charges will vary depending on TCR banding. We've detailed the prices for all TCR bands below, you can find out more about Ofgem's Targeted Charging Review and what this means for your business at britishgas.co.uk/business/blog/ofgems-targeted-charging-review-explained
